WALDORF MARBLE

where quality and beauty meet

Creating fine quality products since 1977

Custom Cast Polymer Manufacturing

Traditionally our colors have complimented and/or coordinated with the colors of the major plumbing companies in our area; such as American Standard and Kohler. For example, the color seafoam green can be made in four different varieties. Standard color, designer color, solid color and onyx. In addition we offer at least twelve colors of cast polymer granite.

COLOR AVAILABILITY

Almost every Kohler, American Standard, and Eljer Bath color is available in four different versions

	STANDARD An off white background with one color veining
	DESIGNER Color background with one color veining (usually white), or color on color
	SOLID Solid color only - no veining
	ONYX Translucent background with white veining plus designated color as additional veining
	<i>plus</i> 12 granite colors, made with full-thickness granite matrix
	<i>plus</i> Custom color capability (coordinate with a laminate, paint or wallpaper sample)
