

## GENERAL INFORMATION

Before installation, please keep in mind that Fypon products:

- Should be used for decorative purposes only, not to provide structural support (except Structural Columns, Balustrade Systems and Porch Posts).
- Should never be installed with mechanical fasteners only. For best results always use non-corrosive fasteners along with urethane base PL Premium Adhesive.
- Are easy to repair. Use wood filler or automotive filler to quickly fill dents or gashes of any size. Broken moulding can be successfully rejoined with urethane base PL Premium Adhesive.
- Should not be stored in extreme heat. Acclimate before installation. Due to urethane's high insulating value, this may take up to 10 hours.
- Will resist the elements, except for direct sunlight to the yellowish (unpainted) underside of the millwork. It is important to fill damaged or cut surfaces with putty, caulk, and/or paint within a few days.
- Can withstand temperatures of about 140°F (60°C). However, the millwork should never be placed in an area subject to solar temperature buildup, such as behind a storm door.
- Can be used safely in accordance with SBCCI, BOCA, CABO and NFPA rulings. There are no official independent laboratory fire test results for Fypon products. The products are equivalent to any decorative urethane products not specifically formulated for fire resistance.
- May require altered installation procedures to meet local specifications. Check local building codes.
