* Because Granite and Marble are natural materials, they are subject to variation in mineral composition affecting color, flecks, striation and other aspects of appearance. Because of variation, more than one top should not be used in the same area. Sample chips will vary from actual product. No two granite or marble pieces are alike—making each vanity top a beautiful, one-of-a-kind masterpiece.

Due to the nature of the printing process, colors shown may vary slightly from actual products.
