Maple & Cherry

INTERIOR DOORS

Two classic wood species have joined the Simpson family: maple and cherry. Long considered to be among the finest and most prestigious American hardwoods, maple and cherry are natural additions to our existing collections.

MAPLE

- Universal appeal
- Compatible with a broad range of architectural styles
- Light in color
- Visually attractive grain patterns

MAPLE specifications

We exclusively use hard maple. Notably known for its timeless beauty and strength, hard maple is a resilient wood species, able to take the abuse of day-to-day wear. The look of maple is defined by classic cathedral patterns composed of a fine texture and uniform grain. Maple's natural creamy hues and understated aesthetic appeal are sure to add warmth to any home's interior decor.

CHERRY

- Smooth, satin texture
- Reddish brown in tone
- Fine grain pattern
- Upscale, sophisticated presence

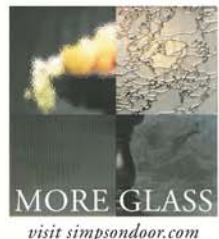

CHERRY specifications

We use only color-matched cherry that is all heart with no sap wood allowed. The popularity of cherry can be attributed to its warmth, ease of use and exquisite character. The sophisticated color, uniform texture and attractive grain pattern of cherry have long made it a popular wood selection for furniture, flooring, cabinets and musical instruments.

Please note: Many of the French door designs on the opposite page are shown with clear glass. However, Simpson has a wide selection of tempered glass choices. For the most current options, visit simpsondoor.com.

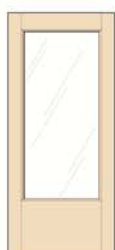

Looking for something different? Simpson has hundreds of standard design configurations, as well as complete custom capabilities. Contact your Simpson Authorized Dealer or visit simpsondoor.com for more details.
